

Bisecting Segments & Angles
Do Work on Sheet

- 1) Bisect \overline{AB} .

- 2) Bisect \overline{CP}

- 3) Bisect $\angle DEF$

- 4) Bisect $\angle CDE$

- 5) Construct \overline{AB} such that $AB = 2(CD)$

- 6) Construct $\angle ABC$ congruent to angle $\angle MLN$

Continue with the work on the back

7) Solve for x : $x^3 + 4x^2 = 21x$

8) Will a triangle with sides 4, 7, and 8 be a right triangle?

9) The length of a rectangle is represented by $x - 3$. If the width is 11 more than that, and the area is 60 meters, find the dimensions of the rectangle.

10) Solve for x : $\frac{2}{3}x - 37 = 41 - \frac{4}{7}x$

11) Sketch $y = x^2 - 7x + 3$ below. Find:

- a) maximum
- b) x-intercepts
- c) y-intercept
- d) window that you used to graph
