

Construction Review Do Work on this Sheet

Answer each of the following. Be sure to include a sketch as part of your answer when appropriate.

- 1) Create line segment \overline{FD} whose length is twice the measure of \overline{AB}

- 2) Construct $\angle DEF$ equal to $\frac{1}{2} m\angle ABC$.

- 3) Construct a line perpendicular to \overleftrightarrow{CD} passing through Point P.

- 4) Construct a 105° angle.

- 5) Draw a line **parallel** to \overleftrightarrow{EF} through point P.

- 6) Construct an **isosceles triangle** given the base and a leg.

Continue with the work on the back

- 7) Construct an angle whose measure is equal to the $m\angle A + m\angle B$. Call it $\angle DEF$.

- 8) Construct a square. (Hint: the diagonals of a square are equal, bisect each other, and are perpendicular)

- 9) Construct a 120° angle.
